

## Pacific NX

### Product Aim

The most effective unit of its kind, the Pacific NX offers the coverage and quality of a perimeter style system, with the convenience of a mobile unit, at an affordable price.

### How it works

The Pacific NX is trailer mounted so that it can be taken directly to the source of the problem. The NX trailer carries a 1125L capacity bowser, which is filled with either dilute *Odr*, or water for dust applications. A 100m nozzle line (50m either side) is then deployed on to pig tail stakes (included), around the problem area. As the nozzle line is flexible, you can tailor your use of Pacific NX to provide a unique solution, each time you use it.

Diesel powered, the Pacific NX provides an industry best coverage, of 100m, which produces a finely atomised mist from the contents of the bowser (the atomised mist suppresses dust and with the addition of *Odr* neutraliser, will also provide effective odour control).

Turnkey operation gives up to 4 hours continuous running on one tank and all fittings are push fit, making the Pacific NX the convenient, effective and affordable solution, to mobile odour and dust control.

The Pacific NX is available to purchase or at competitive hire rates.

### Features

- Trailer mounted 1125L bowser tank
- 4hrs continuous operation
- 100m of high pressure nozzle line (included)
- 50 high pressure brass Nozzles (included)
- 10m of high pressure manifold (included)
- Push-fit stainless steel fittings
- Available to purchase or hire

The design and specification may alter dependent on the individual needs of the project and the unit may subsequently differ in appearance to the one shown.
