

## Vortex FX

### Product Aim

To provide a completely mobile solution to localised odour issues.

### Typical Applications

- Remediation
- Landfill Sites
- Composting Sites
- Water Treatment

### How it Works

The system works most efficiently with the *Odr* range of additives, non-toxic odour neutralisers supplied by Air Spectrum. The correct amount of *Odr* (dependant on which of the *Odr* range is being used) is put directly into the 1125l bowser and water from a clean, potable supply is then added to top up. The Vortex FX requires a 110V or 240V electrical supply which requires a generator of at least 5.5kVA, to be supplied by the user.

The Vortex FX operates on a simple on/off, producing 10m of finely atomised mist. this allows close targeting of neutralisation of odours, delivering a local mobile odour solution.

The *Odr* range is produced using bio-degradable essential oils to effectively neutralise odour particles, rather than simply masking the odour. Please see the *Odr* additive product datasheet for more information.

### Available to Purchase or Hire

The Vortex FX is available either at competitive hire rates, or can be purchased at an affordable price.

The design and specification may alter dependent on the individual needs of the project and the unit may subsequently differ in appearance to the one shown.

### Features/Benefits

- **1125L bowser tank**  
Provides a full day's operation before refilling
- **10m dispersion coverage**  
Gives accurate localised treatment
- **No Nozzles**  
So no risk of blocking
- **Trailer mounted**  
To give exceptional mobility
- **Finely-Atomised-Mist**  
Air Spectrum's proven odour control technique
